

PIT WATER GAUGE

Improved 'NMC' Water Gauge comprise two no 6mm straight corning glass tubes terminating into a brass block with a connecting passage. One limb is open to atmosphere & other is connected to fan drift. A tap is provided to close the connection while taking reading. A scale with adjusting screw is mounted behind the glass tubes. A spirit level helps in keeping the instrument vertical.

OPERATION

- Check that bubble of spirit level is central.
- Bring Zero scale in alignment with lower water level.
- Pressure difference between two limbs is indicated by scale reading.

SPECIFICATION

- Length x Breath x Height = 485 mm x 90 mm x 56 mm.
- Scale range = 150 mm.
- Least count = 1 mm.
- Nett weight = 2.5 kgs. Approx 1 male.
